

SITTING ROOM / SR-01

The window corner.

Parlor palm + pale mineral vessel. A soft vertical accent against a low, quiet furniture line.

THE PAIRING

Parlor palm

Fine foliage.
Open silhouette.

Pale mineral

Matte. Simple. Grounded.

~48" OVERALL

~30" CANOPY

Styling targets / confirm the actual specimen

OUR DIRECTION

Let the foliage lift the composition; let the vessel settle into the stone-and-linen palette.

Fictional room. AI concept imagery illustrates placement and form; no products are sourced or reserved.

SITTING ROOM / MATERIAL OPTIONS

One corner. Two moods.

Keep the plant and placement. Choose how the vessel speaks to the room.

Pale mineral

Quiet and tonal. Echoes the stone table and lets the foliage carry the color.

MINERAL LINEN FOLIAGE

Warm terracotta

Earthy and expressive. Adds a warm note that picks up the timber and woven textures.

CLAY TIMBER FOLIAGE

Finish studies of the same fictional room. Both vessels are illustrative; final material, dimensions and pot fit need selection.

SITTING ROOM / PLACEMENT STUDY

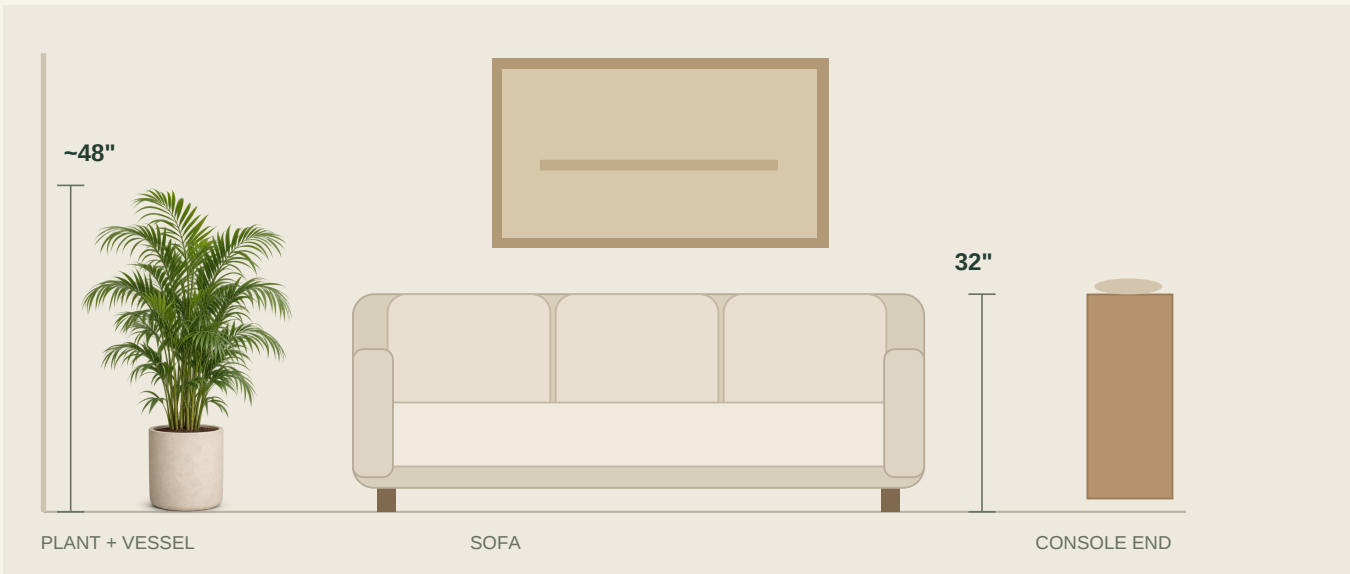

See the whole composition.

SR-01 sits beside the window. The console stays open, and the entry sightline stays clear.

01 / OVERHEAD

02 / SOFA-WALL ELEVATION

- 01 Soften the window edge.**
Leave air around the fronds, curtain and sofa arm.
- 02 Keep the opposite corner quiet.**
An open console balances the single vertical accent.

FORM / SCALE / BREATHING ROOM

Assumed 14 x 16 ft room. Diagram sizes are illustrative; confirm the actual room, furniture and plant before final placement.

SITTING ROOM / SELECTION + CARE

The details behind the look.

A compact handoff for the final selection and everyday care.

SR-01 / WINDOW CORNER

Parlor palm + mineral vessel

Chamaedorea elegans

1 plant composition

~48" overall / ~30" canopy

Pale mineral / matte

Alternative finish: warm terracotta. Confirm the specimen, nursery-pot fit and vessel before ordering.

01 / LIGHT

Bright, indirect light is the starting point. Keep away from cold drafts and direct HVAC airflow. Confirm the light at the proposed position. [1]

02 / WATER + FLOOR

Let the mix dry slightly between waterings. Keep the plant in a draining nursery pot; lift it out to water, drain fully and protect the floor. [1]

03 / HOUSEHOLD

Listed as non-toxic to cats and dogs. Discourage chewing, stabilize the vessel and avoid contact with fruit sap. [1,2]

FOR THE FINAL SELECTION

Use the chosen finish as the design direction. Check actual plant identity, supplied dimensions, planter opening and removal clearance. Products and prices have not been sourced for this sample.
